

1. That a Regional Steering Committee meeting in Africa soon be organised
2. That sustainable resources be dedicated to the Global Secretariat (GS) and that the Management Committee develop a 2-year budget plan for the GS:
To be formulated in link with the ambition of the revised strategy
3. That the Regional Secretariats be strengthened and that both organizations appoint dedicated focal points to the RSCs.
To be formulated in link with the ambition of the revised strategy
4. That the TORs of the governing bodies be reviewed with inclusion of the composition of the GSC and RSCs.
5. That formalized virtual means be developed to keep stakeholders engaged with GF-TADs.
To be formulated as ways forward, possibly in the new context
6. That the addressing of recommendations of GSC10, based on the third evaluation, be continued and informed until the totality of the recommendations have been addressed.
To be formulated in the session on strategy since there is a link table between subobjectives of the 3 pillars and the recommendations
7. That regional approaches developed with the support of regional experts be the preferred way to engage countries in global strategies and to increase country- and regional-level engagement.
To be formulated in link with the revised strategy
8. That both FAO and OIE allocate sufficient human resources to global priority disease groups and that these groups work closely with the Global Secretariat.
9. That performance indicators and reporting tools be developed for monitoring and evaluation purposes of progress.
10. that surveillance capacity for early detection and timely response as well as post-vaccination monitoring capacity, be enhanced.
To be formulated in relation with contribution to capacity building
11. That global strategies of different disease groups be harmonized with regional strategies in order to synergize approaches to better serve countries with limited human and financial resources.
To be formulated as ways forward, possibly in the new context, where constraints on resources pressure more on need for synergies
12. That public private partnerships to address the global strategies of the different diseases be pursued and strengthened.

13. That regional strategies be based on the needs of countries and in line with the strategies of regional organisations.

14. That support from global level specifically focus on capacity development and advocating regional needs at global levels.

To be formulated in relation with contribution to capacity building

15. That existing global strategies and global mechanisms be used to address regional priorities.

16. That the GF-TADs mechanism be used to coordinate specific needs of the regions in case of outbreaks or other emergencies by mobilizing available structures and global tools.

Has been expressed by Asia Pacific at their level, it could be addressed through the introductory poll on 4/11, otherwise refer to the revised strategy

And the remaining recommendations for sessions on 4/11

17. That the One Health approach be reinforced in order to benefit the control of TADs.

18. That better advocacy be undertaken to highlight the importance of combating TADs for the benefit of One Health issues such as Antimicrobial Resistance (AMR).

19. That the GF-TADs mechanism cooperate more closely with the Tripartite mechanism, specifically on zoonotic diseases that are regional priority TADs as well.

20. That the importance of well-functioning veterinary services be promoted by GF-TADs governance structures, not only for TADs but also for One Health.

21. That a joint GF-TADs resource mobilisation strategy be developed.

22. That new objectives and indicators be identified to link GF-TADs to a One Health approach.

23. That the proposed global strategy, based on three pillars, be developed in an operational plan with a theory of change approach and clear and measurable indicators.

24. That contributions from different stakeholders, including the private sector, be taken into account and merged in future strategies at global and regional levels.
